

Richland School District 2 – Case Study

Modernizing Education Asset Tracking with a Cloud-Based Solution

About Richland School District 2

Located in South Carolina, Richland School District 2 serves dozens of schools with a commitment to excellence and equity in education. With hundreds of valuable assets—including laptops, tablets, and furniture—the district needed a modern system to replace error-prone spreadsheets and reduce time spent on manual asset management.

The Challenge: Outdated Methods and Lack of Visibility

Before implementing our [Asset Tracking System](#), Richland School District 2 faced key challenges:

- **Manual Tracking:** Assets were managed in spreadsheets, leading to human error and ghost assets.
- **Data Inaccuracy:** Staff often failed to update asset records, resulting in unreliable information.
- **Limited Reporting and Visibility:** No audit trail, limited insights, and inefficient inventory checks.

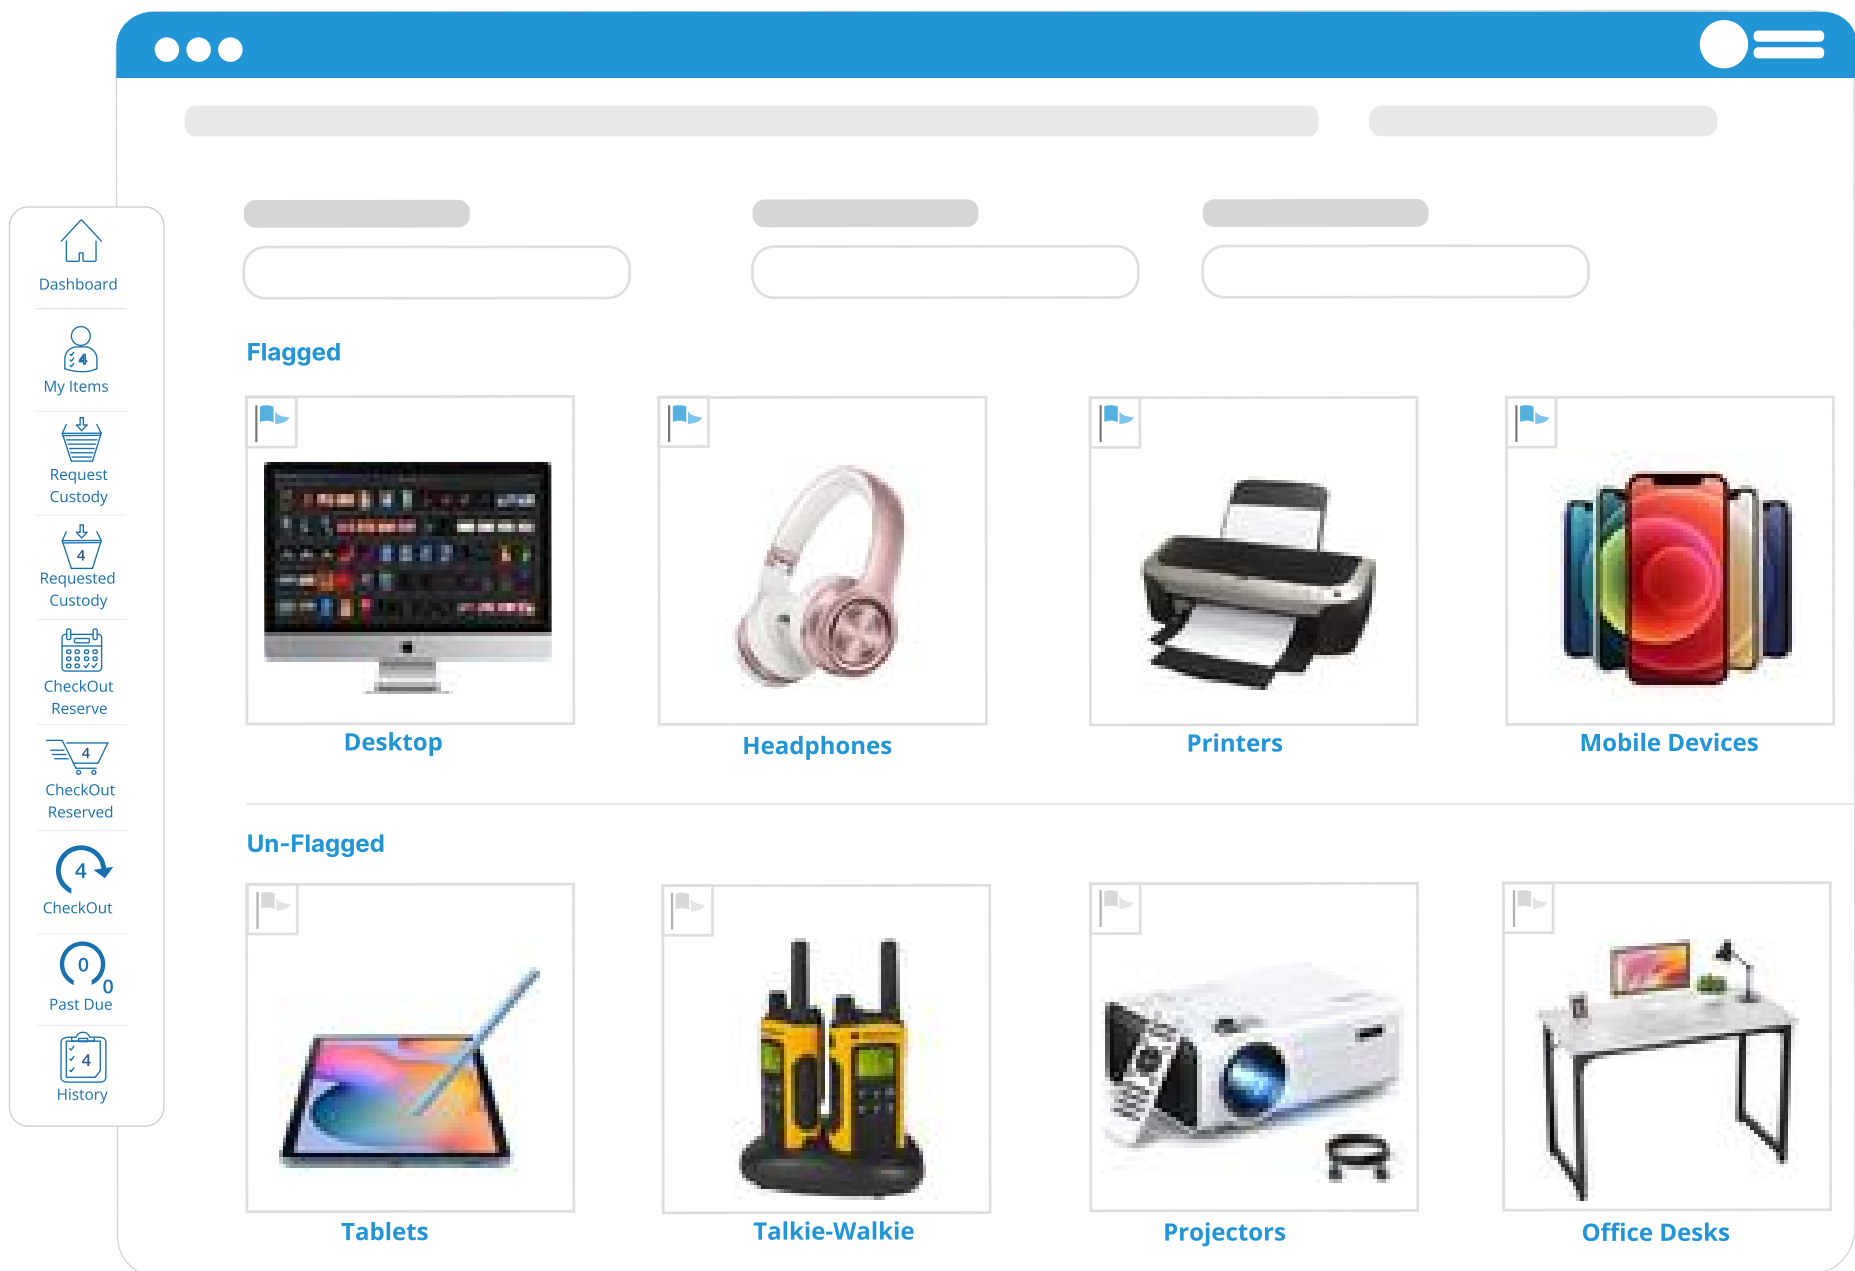

These issues impacted operational efficiency and increased the risk of asset loss and financial waste.

Why Richland School District 2 Chose Our Software

The district evaluated multiple platforms before selecting our Software for its:

- **User-Friendly Interface:** Minimal training required and quick adoption by staff.
- **Advanced Features:** Asset cycle counts, customizable dashboards, and multi-level user permissions.
- **Cloud-Based Accessibility:** Real-time access to asset data across multiple campuses.
- **Excellent Support:** Responsive customer service ensured a smooth setup and onboarding process.

Implementation and Results: A Smarter Way to Track School Assets

Richland uses our System cloud-based Education System to manage devices, furniture, and more. The district takes advantage of features like asset cycle counts and advanced reporting to streamline internal audits and improve transparency.

"This system modernized our asset tracking and saved us time, money, and stress. We were able to expand our subscription and configure dashboards to fit our exact needs."

– Angel Hawkins, Keels

Post-implementation outcomes include:

- **Improved Accuracy:** Fewer asset discrepancies and better recordkeeping.
- **Increased Efficiency:** Time saved on inventory checks and updates.
- **Scalability:** Expanded usage with more users and features over time.
- **Greater Visibility:** Staff and administrators are aligned on asset usage and availability.

Industry

- Education

Key Challenges

- Outdated, manual spreadsheet-based tracking
- Human errors and ghost assets
- Time-consuming inventory updates
- Lack of audit trail and asset visibility

Benefits

- Modular, web-based system with easy learning curve
- Accurate asset history and audit-ready reporting
- Configurable dashboards and user-level controls
- Scalable solution with responsive support

Looking to Upgrade Your School's Asset Tracking?

Whether your district is large or small, our education-focused asset tracking solution can save time, money, and resources.
