Invictus International Consulting – Case Study

A Simple, Scalable Asset Tracking System for Government and Commercial Clients

A scalable system to grow with company needs globally

Based in Virginia, Invictus International Consulting is a premier provider of solutions to the National Security and Defense communities. The firm supports both commercial and government clients, offering expertise across cybersecurity, IT, and other mission-critical sectors. As the company grew, Invictus needed an efficient way to track assets and support accurate financial reporting.

The Challenge: Simple and Reliable Asset Tracking

Invictus faced several operational challenges:

- **Tracking Efficiency:** Needed a better way to monitor physical assets without relying on massive spreadsheets.

- **Cost Management:** Required a cost-effective solution to meet asset tracking needs.

- **Depreciation Reporting:** Needed to track the cost and depreciation of assets for accurate tax documentation.

- **Scalability:** The system had to support future company growth and track assets globally.

Why Invictus Chose BarCloud

After extensive research, Invictus selected our Asset Tracking system for its:

- **Affordability:** Provided enterprise-grade features at a reasonable price.

- **Simplicity:** Easy to implement and use, with valuable training sessions.

- **Barcode Integration:** Assets are labeled and tracked quickly with barcode scanning.

- **Depreciation Feature:** Enabled tracking of asset value over time for accounting purposes.

"We chose our Systems Asset Tracking Solution over the other systems as it was available at a good price point and the employees were great to work with."

- Thomas Ciampi, Invictus International Consulting

Implementation and Results: Fast Deployment and Immediate Benefits

"The process was very simple. Once the product had been purchased, we were provided with a login and then we were online.

Implementation of the Barcode-Based Asset Tracking System was smooth:

- **Fast Start:** Login credentials were quickly provided after purchase, enabling immediate access.

- **Simple Learning Curve:** Training was effective, and staff was able to begin using the system right away.

- **Operational Improvements:** The firm tracks everything from IT equipment to office furniture.

Key benefits post-implementation:

- **Efficiency:** Avoided large spreadsheets with streamlined digital asset tracking.

- **Visibility:** Clear oversight of assets for internal and external reporting.

- **Scalability:** Ready to support the company as it expands operations globally.

Sidebar

Industry

- Consulting / Government & Commercial Services

Challenges

- Needed to accurately track company assets
- Required depreciation tracking for tax reporting
- Lacked an easy-to-use, cost-effective, web-based solution

Benefits
